COFFEE EQUIPMENT

Good looking, high quality, robust Stainless Steel WFM126A Water Fountain...

...ideal for Schools, Gyms and Public Areas.

A good looking, high quality, robust Water Fountain. The **brushed finish** Stainless Steel Panels gives the WFM126A its high quality looks.

Incorporating high performance direct chill/pressure cooler technology, the WFM126A provides up to 15 litres/hour of deliciously chilled drinking water.

To adjust for different mains water pressures, the water flow to the Bubbler and the "swan neck" Glass Filler is adjustable. The Glass Filler is firmly **screwed** into the overflow tray (tamper resistant).

The Water Fountain comes with a 2 metre long drain pipe.

**The WFM126A, a good looking, high quality and robust Water Fountain.
Another quality product from the AA First stable – for next day delivery to you.**
